Once you are logged in, click on the *myGeoTMSWeb* on the left to see all the permits under your account.

Bolton Fire Department Permit Activation Instructions

January 15, 2012

This page is where we can view all applications and inspections. We want to look at issued applications. Click on the *Issued Applications* tab to view your burning permit.

Now all you need to do is activate the permit! Simply Click on *Activate*.

If open burning is allowed, you should see a message indicating your activation for today was successful. If the *Activate* link is replaced

with "*No Burning*" it is most likely because the Fire Department has determined that conditions are too dangerous to burn, the air quality is not good enough for burning, or the season has ended.
